

Jev Chat Jarvis: Get AI Replies on Android

7,293 stars · MIT · checked 2026-10-03

WHAT IT IS

Jev Chat Jarvis is a privacy-first AI co-pilot for Android that judges intent and context to draft replies, running locally under an MIT license.

GET IT RUNNING

```
adb install -r apk/jev-assistant-v1.4-release.apk
Open Jev Assistant, go to Settings > Interfaces, and fill in an
OpenRouter API key or select the 'Bocha Jev' preset.
Enable Accessibility, Overlay, Autostart, and unrestricted battery
usage permissions.
```

MAKE THESE 3 THINGS

- Draft context-aware replies to messages, choosing from three ranked options.
- Analyze messages for intent, danger level, and suggest appropriate responses (e.g., flagging phishing attempts).
- Utilize a local knowledge base and contact profiles for personalized replies.

SKIP IT IF

Cannot process content from WeChat on Android due to system restrictions. Not for users seeking automatic message sending.
