

ZCode: Get a Coding AI Running in Min (7,286 Stars)

7,286 stars · Apache-2.0 · checked 2026-10-01

WHAT IT IS

ZCode is an open-source AI programming workbench from Z.ai that runs on your machine, offering terminal and browser interfaces for writing, debugging, and refactoring code.

GET IT RUNNING

```
pnpm bootstrap
pnpm --filter @zcode/cli dev
pnpm dev:web
```

MAKE THESE 3 THINGS

- Generate entire components from specifications
- Debug issues by analyzing stack traces and suggesting fixes
- Refactor functions and manage files

SKIP IT IF

If you seek a one-click, no-setup solution or are unfamiliar with command-line tools. It's for developers wanting deep control and customization.
