Run Nemotron-3.5-Transcribe: 40 Languages Offline

24,357 downloads · checked 2026-10-31

WHAT IT IS

Nemotron-3.5-Transcribe is a free, open-weight, offline speech-to-text model from NVIDIA, capable of transcribing 40 languages locally.

GET IT RUNNING

```
export VLLM_PLUGINS=nemo_speechlm
export VLLM_MAX_AUDIO_DECODE_DURATION_S=3600
export VLLM_MAX_AUDIO_CLIP_FILESIZE_MB=180
export VLLM_USE_V2_MODE
```

MAKE THESE 3 THINGS

- Transcribe up to an hour of audio in 40 languages with speaker attribution.
- Generate word-level timestamps for precise editing and synchronization.
- Perform audio question answering to query the content of recordings.

SKIP IT IF

Requires an NVIDIA H100 GPU with 80GB VRAM. Not feasible for casual desktop use or users without professional-grade hardware.
